IRDDR FOR ADB SUPPORTED ASSAM SWIFT PROJECT

A. PROJECT BACKGROUND

1. The Government of Assam has requested the Asian Development Bank (ADB) to support the Sustainable Wetland and Integrated Fisheries Transformation (SWIFT) Project. The proposed project will support the State in promoting sustainable fishery-based livelihoods for communities dependent on floodplain wetlands, locally known as *beels*¹. The project aligns with Assam Vision 2030 and focuses on sustainable development of the fisheries sector while enhancing the livelihoods of small-scale producers².

2. Assam is the largest state in India's North-Eastern region, with an estimated population of 31.2 million³. Although its Gross Domestic Product (GDP) per capita grew by 5.3% in FY2020, it remains about 35% below the national average. Poverty reduction has also been slower, with about 32% of the population classified as multi-dimensionally poor and living below the national poverty line⁴. Around 86% of the population resides in rural areas and depends largely on agriculture and allied sectors, including fisheries, which employ nearly 70% of the rural workforce. Agriculture contributes about 30% to the Gross State Domestic Product (approximately US\$ 57 billion in 2022)⁵.

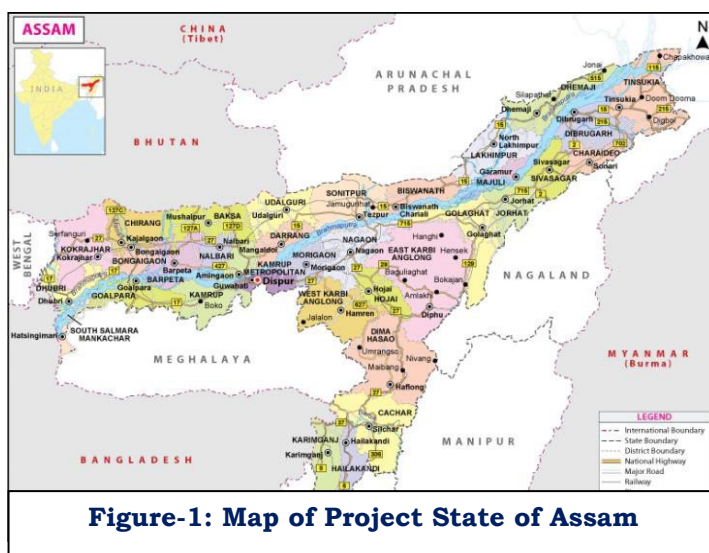

Figure-1: Map of Project State of Assam

3. Assam has rich aquatic resources, including floodplain wetlands (*beels*), swamps, ponds, and rivers. The *beels*, covering over 72,000 hectare, are the most important fishery resource of the State and support multiple uses and users. Assam is the fourth-largest inland fish-producing state in India, with production of about 443,000 metric ton in 2022–23. Fisheries provide livelihoods to over 2.5 million people, particularly in rural areas.

The sector also plays a key role in nutritional security. Fish is a staple food and a major source of protein, with over 90% of the population consuming it. The State currently exports around 20,000 metric ton of fish annually to meet per capita requirements⁶. Fish production in Assam comes mainly from aquaculture (ponds and tanks) and capture fisheries in *beels*.

¹ A beel is an Assamese and Bengali term for floodplain wetlands. Wetlands include habitats such as mangroves, peatlands and marshes, rivers and lakes, deltas, floodplains, and flooded forests, etc.

² Government of Assam. 2016. Assam Vision 2030, Fisheries Sector. Guwahati.

³ Census of India. 2021.

⁴ NITI Aayog. 2021. India: National Multidimensional Poverty Index Baseline Report. Delhi.

⁵ Government of Assam. State Income Statistics, 2022. Guwahati.

⁶ It is estimated that fish requirement is 15 kg per capita, per annum.

4. Beel fisheries are typically connected to river channels and cover an area of about 72,000 hectares. These wetlands are seasonally inundated by floodwaters and act as natural water storage systems, contributing to flood moderation. They are also important sources of fish germplasm and provide ideal conditions for spawning and breeding. Beels contribute up to 11% of the State's total fish production.

5. However, Assam beel habitat is reported to be degrading over the period due to decreasing connectivity with adjacent rivers, and human-induced pollution factors. Extensive embankment for flood control, heavy silt loads from the Brahmaputra, deforestation, and intensive agricultural practices have damaged this connectivity through siltation, isolating beels from seasonal floods, and restricting the entry of riverine fish stocks. Floating weeds, such as water hyacinth, have a detrimental impact on plankton abundance, resulting in poor fisheries productivity. Overfishing, prevalence of exotic and invasive fish species, poor community participation in management of beels and fisheries value chain are some other factors observed to be found responsible for degradation of beel ecosystem.⁷

Figure 2: Traditional Pattern of Beel Fishing

6. The proposed project will address the importance of (i) strong institutional frameworks and governance structures, establishing clear rules, roles, and responsibilities; (ii) provision of economic incentives and livelihood diversification to enhance the commitment of communities to conservation efforts; (iii) adaptive management to changing conditions and feedback from the community and being flexible to adjust the project's practices based on monitoring results; (iv) combination of traditional knowledge and latest techniques to enhance resource management practices; and (v) the engagement of local communities in decision-making processes from the outset, enabling strong community ownership and active participation. The primary beneficiaries for the project will be the fisher communities/beel users with increased productivity and community-based sustainable beel management. The proposed project will have the following three outputs.

7. **Output 1:** Institutional capacity and regulatory framework for sustainable beel ecosystem and fisheries management strengthened. The output aims to reform the current government system on beel management, particularly the leasing system. It will support the following activities: (i) updating relevant beel management and fishery acts, regulations, and rules for community-based management, and preparing public awareness-raising materials; (ii) preparing rules or guidelines for community-based beel management system, considering various hydrology of wetlands, channels, agroecological situations, and providing necessary training on the subject; (iii) preparing a sustainable operational model as a project exit plan; (iv) capacity building and training of the Department of Fisheries (DoF) staff and other allied public

⁷Sector assessment: agriculture, food, nature, and rural development sector(fisheries)ADB

institutions, including the state's wetland authority, in latest fisheries stocking and conservation techniques, community-based beel management best practices, and use of digital technologies; (v) supporting research and development in beel management and fisheries, including carbon sequestration benefits from beel management, climate change impacts and adaptation measures, seed production and breeding, and ex-situ conservation of endangered species; (vi) strengthening beel community-based institutions; and (vii) operating beel management monitoring system through the development of project information system and beel fisheries knowledge platform, complementing the state wetland authority's wetland notification process.

8. **Output 2:** Community-based fisheries business developed and beel community income diversified. The project will ensure the sustainability of beel community-based institutions by enhancing their financial viability and strengthening women's and marginalized groups' participation in economic activities. The project will: (i) support the development or strengthening of fisheries cooperatives; (ii) conduct capacity building for these cooperatives through training in organizational and financial management, as well as branding, marketing and processing along the value chain; (iii) provide public sector support for the development of community-based fisheries value chain infrastructure, including fish landing sites and local aggregation points/centers; (iii) promote private sector-led fisheries commercialization by creating matching grant facilities for hatchery, feed mill, primary processing and other value addition initiatives; and (iv) support other income generation activities for self-help groups (SHGs) through strengthening or revitalizing self-help groups based on their needs assessment.
9. **Output 3:** Beel conservation and restoration planned and managed. The project addresses habitat loss caused by the loss of connectivity with the adjacent river and decreasing water depth, and macrophyte growth that hinders fisheries productivity in beels. The beel restoration approaches will focus on: (i) beel demarcation; (ii) beel rejuvenation, such as de-weeding and desilting; and (iii) beel's water inflow and outflow control improvement, including desilting, constructing embankments, installing silt traps, building water retaining structures and peripheral bunds, and installing biofilters.

B. PROJECT COMPONENTS

10. The Project includes strengthening of institutional capacity and regulatory framework, community-based fishery and diversification of income, and restoration of 102 beels across the state. The purpose is to enhance beel fishery productivity and community-based sustainable wetland management in the state of Assam.
11. The project will target a total of 102 beels across the state of varying size i.e. Large (50–300 ha), Medium (15–50 ha) and Small (0–15 ha) across Assam. For project readiness, around 74 beels in priority will be selected for phase-1 financing and implementation (**Appendix-1**). The balance number of beels to be implemented under phase-2 will be subsequently selected during the phase-1 implementation. Having similar project components for similar nature of beels, the resettlement impact is also envisaged as similar for all beels under different categories. The project components and sub-components are described in the table below:

Table1:Outputwise Sub-project Components

SL.	Output	SL.	Component	Sub-Component
1	Output-1: Institutional capacity and regulatory framework for sustainable <i>beel</i> eco system and Fisheries management strengthened	1	Update relevant beel management and fishery acts, regulations, and rules	- Identify critical areas for updates for community-based beel ecosystem and fisheries management - Prepare and announce rules or guidelines for the community-based beel co-management system - Prepare a sustainable operational model (project exit-plan).
		2	Capacity building and training of DOF staff and other allied public institutions	Conduct training and exposure visit for DoF staff and other allied public institution staff including state wetland authority
		3	Strengthen or Develop beel community-based institutions (or beel development committee)	- Support beel development committees and Panchayat to prepare beel development committee operational guidelines - Conduct training in group management, facilitation, financial management, community-based procurement for beel development committees - Conduct training of beel development committee members in sustainable beel ecosystem management best practices and climate change - Support beel development committees to prepare beel integrated management plans including O&M procedures and in consideration of wetland notification - Support implementation of beel integrated management plans including leasing support and performance-based matching grant - Conduct audit of beel development committee & performance appraisal
		4	Establish and Operate beel management monitoring system	Develop project MIS, including FM module, and beel fisheries KM platform, complementing wetland notification process
		5	Establish and Operate the project management unit	KM materials
2	Output2:	1	BDC capacity building and	Provide training in organizational management, facilitation, business

SL.	Output	SL.	Component	Sub-Component
	Community-based fisheries business developed and beel community income diversified.		inclusion in fisheries VC -	plan development, and financial management • Conduct a market survey
		2	Public support for community-based fisheries value chain infrastructure development	• On-beel Infrastructure • Off-beel infrastructure
		3	Private sector and entrepreneurial-led fisheries commercialization	• Beel fisheries business development fund operation. • Payment-based extension services development for fish production practices • Conduct training and exposure visit in branding, market development, and innovative processing and packaging along the value chain
3	Output3:Beel conservation and restoration planned and managed	1	Beel demarcation	• Demarcation/ updation of boundaries on cadastral map • Posting of pillars around the beel boundary
		2	Beel rejuvenation	• Need based De-weeding • Need based De-silting • Earthen mounds as applicable
		3	Beel inflow and outflow control improvement	• De-silting of beel connecting channels • Construction of need based embankments • Installation of silt traps where required • Construction of need based water retaining structures & peripheral bunds • Installation of hume pipes
		4	Beel conservation and restoration design for additional target areas	• De-weeding through BDC

C. NEED AND OBJECTIVE OF THE DUE DILIGENCE

12. The proposed project interventions (on-beel and off-beel) will be carried out within the beel boundaries or on land owned by the government. Project component requiring acquisition of private land will not be considered under the project and hence, no physical or economical displacement is envisaged.
13. The proposed subproject interventions are components of a project loan related to project readiness and as a follow-up to the project. The social safeguard policy requirements of ADB and the Government of India aim to ensure that the project

assesses and identifies impacts or risks related to involuntary resettlement and Indigenous Peoples safeguards associated with the proposed subprojects. The Borrower has conducted a due diligence study to confirm any impacts.

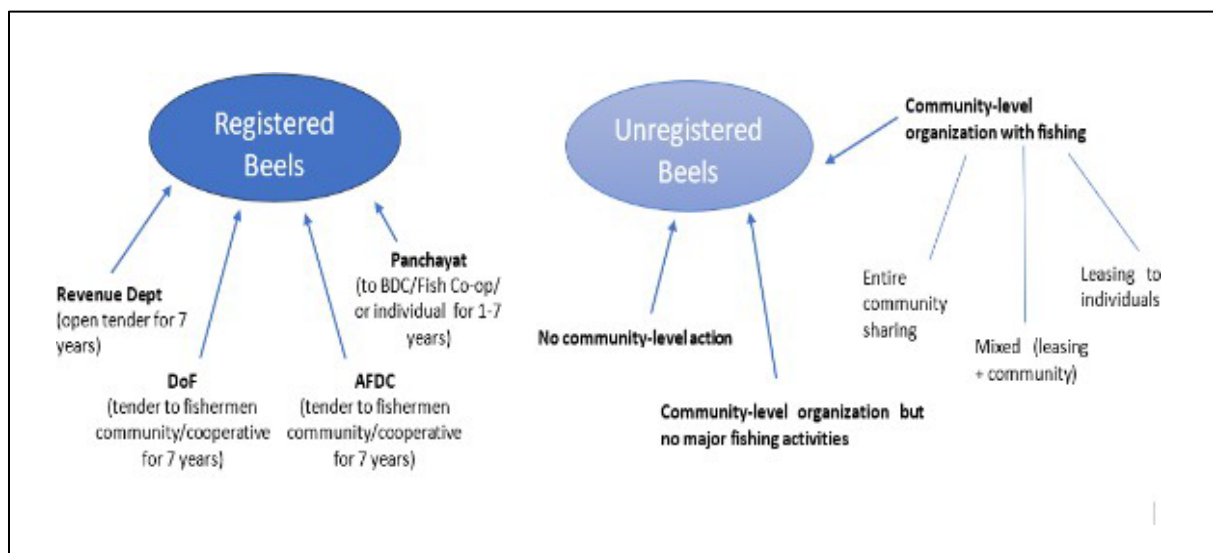

D. METHODOLOGY FOR DUE DILIGENCE STUDY

14. The social safeguard due diligence study is based on review of project-related documents including (i) DPR, engineering design, (ii) review of land ownership-related documents (cadastral maps and ownership records available with revenue department) of the proposed site, (iii) on-site observations and assessment of proposed land, and (iv) consultation with the Beel Resource Users and other stakeholders.

E. SOCIAL SAFEGUARD PLANNING ARRANGEMENT

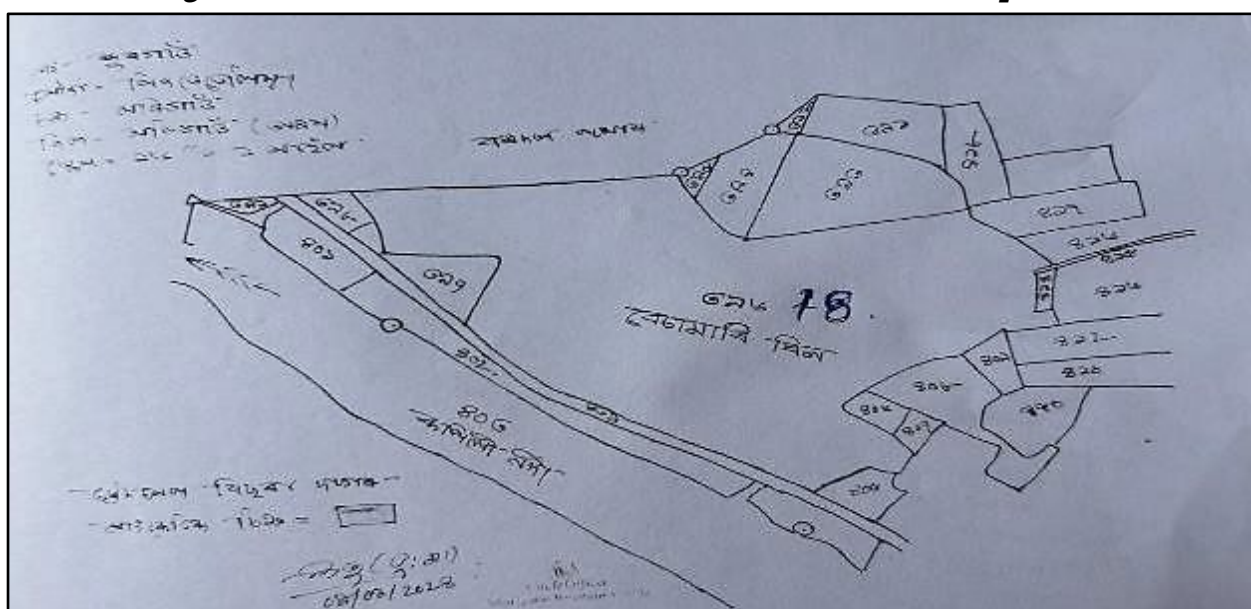

15. Assam Beels are basically Common Property Resources (CPR) and are categorized as Registered and Unregistered Beels. Registered Beels are officially recorded in government records (Register of Fisheries) and notified for government settlement/revenue purposes and have well defined boundary and area whereas the Unregistered Beels are not entered in the official fishery register and not formally settled by the government and have no formal boundary and direct revenue to the government. Registered Beels are registered with the different departments/organizations like Revenue, Fishery, Panchayats and Rural Development departments, Assam Fisheries Development Corporation (AFDC) and are leased out to individuals, fishermen cooperative societies, societies, SHGs for fisheries and related activities under different sets of norms and regulations of the concerned departments/organizations. Though Beels are CPRs, the existing leasing/settlement system do not allow free access to the Beel riparian community and are being deprived from the fruits of effective utilization of the resource for their livelihoods through fisheries and other activities. Also, the system does not attract the high investment for its sustainability in the long run. Unregistered Beels are mainly Community-managed Beels and usually no direct revenue to government
16. Thus, unregistered beels, are community managed, not officially recognized and lack formal management and regulatory frameworks. The absence of official oversight results in a more flexible yet potentially unstable management system. The current status of beel management and benefit sharing is given below in Figure 3.

Figure 3 – Beel Benefit Sharing Mechanism

17. In view of the persistent challenges relating to access, resource management, and dispute resolution pertaining, it is imperative to strengthen community-driven approaches to ensure the effective, equitable, and sustainable management of beel resources. In this context, there is an urgent need to evolve a comprehensive and uniform policy framework, in the form of guidelines and Standard Operating Procedures (SoPs), for the management and leasing of beels, so as to facilitate equitable access and meaningful participation of local beel-dependent communities. The proposed framework shall be inclusive, enabling participation of Community-Based Organisations (CBOs), bona fide fishermen cooperative societies, Self-Help Groups (SHGs), and other grassroots institutions in leasing and management processes, thereby promoting a participatory and sustainable governance model. Further, priority may be accorded to the identification and registration of unregistered beels to bring them under structured management frame-works, to ensure its ensuring effective utilization including long-term conservation through appropriate community institutions. Additionally, emphasis is required on promoting alternative livelihood opportunities for beel-dependent communities during the notified fishing ban period under the provisions of the Assam Fishery Rules, 1953, as amended, to mitigate seasonal vulnerabilities and enhance socio-economic resilience.
18. To address the above challenges, a set of activities are proposed under the SWIFT project as described in Table 1. Outputs 1 and 2 deal with policy development/reform for equitable access to and sustainable management and use of beel resources. The proposed interventions will not involve land acquisition or any involuntary resettlement (IR) impacts. Output 3 covers construction of on-beel and off-beel infrastructures such as beel demarcation, construction of silt traps, de-weeding and de-siltation of beels, water retaining structures, installation of hume pipes, composting and renovation of existing marketing places, which are proposed to be constructed on government land and therefore, no involuntary resettlement impacts are envisaged.
19. The beel boundaries will be demarcated for both registered and unregistered beels using cadastral maps available with the revenue department. A sample boundary of Bechamari beel in Morigaon district on cadastral map is given below in Figure 4.

Figure 4: Bechamari Beel Boundaries on Cadastral Map

20. All project proposed interventions are limited to the existing beel ecosystems and common property resources managed by the community/DoF and regulated through the Assam Fishery Rules, 1953 (amended in 2005), the Assam Fish Seed Act, 2005, and the Assam Fish Seed Rules, 2010. A government notification on transfer of administrative power of beel fisheries to DoF is provided in **(Appendix-2)**.
21. Due to change in natural course of water and land use, a few of proposed beels have individual or joint ownership (mixed land of government and private). If such a beel is included in the project, a tripartite memorandum of understanding (MoU) among the village head/landowner, beel development committee (BDC), and district fishery development officer (DFDO) is under preparation to ensure coercion-free participation of land owner in the project **(Appendix-3** for community or private land). The same will also be applied for use of community or private land for bio-compost demonstration or construction of access roads to beel based on willingness of the landowner(s).

The MoU is administered through a transparent consultative process and confirms that the parties agreed to consent utilization of concerned land are fully informed about and have willfully given their consent and/or no objection for the benefit of the village community. All the MoUs signed under the project will be verified by an independent Third-Party agency to confirm that the MoUs are signed through a transparent and consultative process without any coercion and that the utilization of land for proposed off-beel infrastructure will not impoverish or displace any owners or occupiers of such land. Keeping in view the importance of prevailing customary practice in the project area, a no-objection certificate (NoC) **(Appendix-4)** is being obtained from the village head confirming to provide all required support during project implementation.

22. As the project will have no land acquisition and resettlement impacts, it is categorized as category 'C' for Involuntary Resettlement (IR). Any project components or subprojects which would trigger the involuntary resettlement safeguards of the ADB's SPS will not be included for funding under the project.

F. INDIGENOUS PEOPLES PLANNING UNDER THE PROJECT

23. The project is category 'B' for Indigenous Peoples. Project categorization as B is due to presence of IPs in the project area and planning and implementation of positive and beneficial measures for the IP communities.
24. Assam is predominantly inhabited by indigenous communities known as Scheduled Tribes (ST) in India. The tribal population is 38,84,371, which is 12.4% of the total population of the state. The tribal population in Assam constitutes 3.72% of the total tribal population of the country. Major tribes of Assam are: Bodo (35.1%), Mishing (17.52%), Karbi (11.1%), Rabha (7.6%), Sonowal Kachari (6.5%), Lalung (5.2%), Garo (4.2%), and Dimasa (3.2%). They constitute ninety per cent of the ST population of the state. Other tribal groups in Assam include Deori, Hajong, Thengal Kachari, Khasi, Jaintia, Mech, Chakma, Mizo, Hmar, Kuki, Naga, Barmans (in Cachar), Man (Tai-speaking), Khampti and Singhpho. The spatial distribution of tribal population in Assam can be broadly classified into two groups: hill tribes and plain tribes.
25. In order to protect the interests of the tribal population, provisions of the Sixth Schedule are enshrined in the Constitution under Articles 244(2) and 275(1) to enable autonomous administration of tribal areas in Assam. Six tribal districts of Assam—Karbi Anglong, Dima Hasao, Kokrajhar, Chirang, Baksa, and Udalguri—have been declared as Scheduled Areas. The administration of these autonomous areas is vested in Autonomous Councils established as per the provisions laid down in the Sixth Schedule. These councils are endowed with legislative, judicial, executive, and financial powers. They are also expected to oversee traditional bodies in local tribes.
26. The Autonomous Councils of the State have the powers to make laws related to land administration and inheritance of property, management of forest and water resources, regulation of jhum cultivation practices, establishment of village or town committees, and matters relating to tribal administration, marriage, and social customs. These councils have also been conferred with additional powers to make laws within their areas on delegated subjects.
27. Under this project, not only the beels used and managed by ST communities will be restored and fish productivity enhanced for livelihoods, but other income generation activities such as weaving, poultry, piggery, etc. will also be promoted among SHGs to strengthen ST household incomes. There will be no loss of any customary or IP-owned land because ownership of land will not change with the use of land for construction of on-beel and off-beel infrastructure.
28. Further, it is confirmed that the project will not have any impact on the traditional knowledge and institutions of IP communities, nor will it promote commercial use of any cultural resources.
29. To ensure that IPs are informed, consulted, and mobilized to participate in the subprojects during project preparation and to ensure equitable sharing of program benefits, an Indigenous Peoples Plan (IPP) is prepared for the project. The IPP will ensure that project interventions are planned in a manner that is culturally acceptable to the beneficiaries and does not affect their customary practices. Meaningful consultation

and participation of IP communities, their leaders, and local government representatives will be an integral part of IPP preparation.

G. FINDINGS OF DUE DILIGENCE STUDY

30. Since the project will include about 102 beels, selection and inclusion of subprojects is ongoing and will continue during project implementation. The due diligence is based on detailed assessment of 74 subprojects (beels) visited during pre-fact finding and safeguard missions. The subprojects are selected based on location, different community setups, number of beneficiaries, type of beel management, etc. These priority subprojects have been finally selected by the DoF.
31. Social safeguard due diligence of 74 subprojects was carried out using a social safeguard screening checklist and in consultation with various stakeholders including subproject beneficiaries. The details of land ownership, encroachment status, and beel management and legal status for each subproject are presented in the table below.

Table 2: Subproject-wise Status of Resettlement Issues and Impacts

Sl .	Name of Beel	Total area (Ha)	Land & Beel Ownership	Encroachment as per revenue records	No. of ST HHs	Beel Management and legal status

32. Having similar project components for similar nature of beels, the resettlement impact is envisaged as similar for all beels under different categories. The due diligence study confirms that the beel land proposed for the restoration does not require any compulsory land acquisition and/or arise any involuntary resettlement impacts due to physical or economical loss. Further, any subproject component with resettlement impact will not be included for financing under the Project. An undertaking for the priority beels has been submitted by the implementing agency (IA) provided as **Appendix-5**. Since the subproject interventions will not trigger any IR impacts, the Project categorization in terms of IR for the entire project will remain the same.
33. The 74 beels assessed indicates multiple kind of ownership as shown in Table 2 above. There are about 23,500 households who are associated with the beels and are beneficiaries of the Project. Of the total 74 beels, all the beels are on government land ownership except eight (8). Of these 8 beels, five (4) beels located in Biswanath, Golaghat, and Dhemaji districts have mixed land, comprising both government and private land. Additionally, four (4) beels in Jorhat and Barpeta districts are on Satra land.⁸
34. It may be noted that the beels having individual or private or institutional ownership were basically farm/barren land that have converted into beel over the period due to change in course of water. Although the land use has changed naturally, the ownership remained the same, and such land are not suitable for any agricultural crop production except utilization through fisheries. These beels have been included in the project based on the willingness of owner/community and MoU will be signed. Prior to the execution of the MoUs, the necessary due diligence will be carried out in accordance with project guidelines and applicable provisions.
35. During the community consultation, it has been informed to the private patta holders and the satra representatives that an appropriate benefit-sharing mechanism will also

⁸Satras are unique Vaishnavite monasteries in Assam, India, serving as central hubs for culture, religion, and the performing arts, founded by 15th-16th century saint Srimanta Sankardeva.

be worked out in consultation with all stakeholders to ensure equitable participation and distribution of benefits arising from development and management of the beel.

36. Of the total 74 beels, all except one—Bhagamur Beel in Nagaon district—are currently unregistered and are being managed by local communities, community-level groups, cooperative societies or informal institutions. Bhagamur Beel is presently under lease from the Bajjagaon village panchayat to a local cooperative society located in the beel periphery. Preliminary consultations with the concerned cooperative society and community indicate their willingness to be part of the Project. The panchayat authority has provided an NOC stating that the current lease would cease to operate and the beel may be developed and managed as per the project approved guidelines by the fisheries department. The risk associated with tenure transition is assessed as low, as the stakeholders of the cooperative society will be integrated into the institutional framework (e.g., Beel Development Committee) to ensure continuity of livelihood opportunities.
37. Among the 74 priority sub-projects, five (5) beels are located in Kokrajhar district, which falls within the administrative jurisdiction of the Bodoland Territorial Council constituted under the Sixth Schedule of the Indian Constitution. Considering the substantial presence of tribal communities in the area, the project will adopt measures to ensure equitable access to project benefits and will design culturally appropriate mechanisms for inclusive participation and benefit-sharing. As an institutional inclusion mechanism, the Bodoland Territorial Council has provided a No Objection Certificate (**Appendix-6**) to the SWIFT Project, thereby endorsing the implementation of project activities in the beels located within its jurisdiction in Kokrajhar district.
38. Engineering survey of all the 74 sub-projects has been carried out. A multi-step technical and participatory process has been carried to validate the beel boundaries and align the revenue map with drone based engineering survey coordinates, and ensure that the identified wetland areas correspond with both official records and actual ground conditions. The process involved the following steps:
 - a. Review of Revenue Records: Initially, available revenue records, trace maps, and departmental documents from the Revenue and Fisheries Departments were reviewed to identify the officially recorded area and ownership status of each beel. These trace maps served as the primary reference for boundary identification as it contain the officially recorded boundaries of the beels along with the map scale.
 - b. Drone-Based Aerial Survey: Based on the aligned trace map scale and contour mapping, drone surveys were conducted over the beel area. The drone survey was planned and executed according to the mapped contours and reference scale, enabling the generation of high-resolution aerial imagery and orthomosaic maps of the wetland.
 - c. GIS Overlay and Boundary Delineation: The drone imagery was processed and integrated into a GIS platform, where the revenue trace map boundaries were overlaid on the drone-generated imagery. This allowed for precise visualization of the existing physical boundary, water spread area, and surrounding land use patterns.

d. Community consultation for Field Validation: The mapped boundaries were further verified through ground truthing and field visits/transect walk, during which the project team confirmed key physical features such as natural bunds, drainage channels, agricultural patches, and settlement areas located within or near the beel etc. Local community members, including fishermen groups, farmers, village leaders, and Indigenous community representatives, were consulted to validate the historical and seasonal extent of the beel. Community inputs helped identify:

- Traditional water spread areas
- Seasonal variations in the beel boundary
- Inlet and outlet channels

e. Final Boundary Validation: Through this integrated approach, combining revenue trace maps, contour alignment, drone surveys, GIS analysis, and field verification, the validated beel boundary was established. These validated boundaries form the basis for engineering design, ecological restoration planning, and social safeguards assessments under the SWIFT Project. A sample of the maps and process followed for beel validation is at **Appendix 7**.

39. One of the beels in Goalpara district named Mariampur Eco-Tourism Lake falls within the jurisdiction of the Athiabari Reserve Forest under the Forest Department. The Forest Department has clarified that any project intervention in the beel must comply with the eco-tourism guidelines of the Ministry of Environment, Forest and Climate Change (MoEFCC) as well as the applicable Joint Forest Management Committee (JFMC) rules. Accordingly, implementation of SWIFT Project activities in this beel will be aligned with these regulatory provisions. The Beel Development and Management Committee (BDMC) will be constituted in accordance with the relevant government guidelines and in coordination with the Forest Department and the JFMC. A beel management plan will subsequently be prepared to guide eco-tourism development and resource management in a manner consistent with forest and environmental regulations.
40. It was found that the management of the priority beels is currently undertaken by registered cooperative society or informal village-level committees or local user groups, which typically oversee only a portion of the beel area. These committees were found to generally operate based on local arrangements, and in most cases no formally prescribed management framework, operational guidelines, or institutional norms are followed for the sustainable management of the beel resources. As a result, management practices vary significantly across locations and are found to be limited in scope.
41. Field assessments indicate varying levels of informal land use within the beel areas across thirty-one (31) beels, including seasonal paddy cultivation and temporary livelihood activities. These land uses have been categorized using a standard classification framework to distinguish seasonal and traditional livelihood practices from permanent encroachments. During community consultations, these issues were discussed with local stakeholders and appropriate mitigation measures were identified and agreed upon. The Project will address these concerns through continued consultations, institutional management by the Beel Development Committees (BDCs),

and compliance with applicable social safeguard requirements. Details on the different types of encroachments and informal land uses observed within the beel areas are provided in **Appendix 8**.

42. Some farming lands (paddy fields) are observed adjacent to the beel boundaries. During demarcation of beels utmost care shall be taken to avoid any impact or boundary disputes. Any unanticipated IR impact during the implementation will be documented by the PIU through CPIU and reported to the ADB through Quarterly Progress Report (QPR). In case of unanticipated impact, a resettlement plan will be prepared by the PMU/DoF and the project's IR categorization will be updated accordingly.
43. All the communities consulted during due diligence are found willing to participate in the program and provided their consent to cooperate. The women SHGs are particularly looking for training and assistance for other income generation activities like weaving, handloom, and livestock rearing, making fish by-products, processing of tea, etc. under the project.
44. ST communities are found in majority of the subprojects. The measures suggested under the IPP prepared for the project will apply for all subprojects to ensure equitable and fair distribution of project benefits among all tribal populations in a culturally responsive manner.
45. During the engineering surveys conducted in the priority beels, it was observed that the access roads to a few beels are in dilapidated condition and require rehabilitation. Improving these access routes is necessary to facilitate safe and convenient access for local communities to the beels and to enable the movement of construction machinery and materials during the implementation of civil works.

As per the applicable safeguard requirements, the project will obtain NoCs from the concerned Village Panchayat, village headman, or relevant Autonomous Council authorities, confirming their consent for the rehabilitation of the rural access roads under the Project. In cases where access to the beel is through private land, due consultation shall be undertaken with the concerned landowner(s). A land donation MoU shall be executed in accordance with applicable safeguard norms and guidelines, ensuring that the donation is voluntary, free of coercion, and properly documented. The rehabilitation works will be limited to improving existing access routes and will not involve land acquisition or displacement. The list of village roads identified for rehabilitation is at **Appendix 9**.

46. Apart from the civil works proposed within the beels, the project will also support the construction of PIU and selected CPIU offices to facilitate the smooth functioning of project activities and to provide adequate and dignified working space for project officials. In addition, repair and refurbishment works will be undertaken in selected CPIU and District Fisheries Development Officer (DFDO) offices, which serve as key community-facing interfaces for fisheries-related services and project coordination. Additionally, renovation works will be undertaken in a few identified frontline service offices, like the Office of the Sub Divisional Fishery Officers and Training Centres with due approval of the ADB in due course of time.

46. All proposed offices are located within existing government buildings and are situated on government-owned land. Therefore, the proposed works will not involve any land acquisition, displacement, or adverse impacts on private assets. The list of offices is at **Appendix-10**.
47. The IA has limited capacity in terms of implementation of safeguard instruments. Training on social safeguard before project implementation is therefore required for all staff at Project Implementation Unit (PIU) and Cluster Project Implementation Units (CPIUs) to ensure effective safeguard implementation under the project.

H. CONSULTATION AND PARTICIPATION

48. Community consultations were conducted across the proposed beel subproject areas as part of the social assessment and stakeholder engagement process for the SWIFT Project. The consultations aimed to inform local communities about the proposed interventions, understand existing livelihood practices associated with the beels, identify potential social risks and concerns, and gather community perspectives on project implementation.
49. The consultations covered multiple districts and beel locations and involved broad participation of local stakeholders, including traditional fishers, farmers, community leaders, women, youth, and members of Scheduled Tribe (ST) communities. The selection of the site was based on field assessment and consultation among the project team and other stakeholders and beneficiaries.

Consultation meetings were organized for all the 74 sub-projects during initial subproject screening, pre-fact finding mission, and safeguard missions fielded during June 2024–March 2026. Overall participation was significant, with more than 2,700 community members, including 1700 males and 1052 females, taking part in the discussions. There was substantial representation of women and indigenous communities.

50. The details, including date of consultations and number of participants, sample of screening checklist, participant list, and consultation photographs for each subproject are attached under **Appendix-11**. The key findings of the consultation meetings in the sample subprojects are summarized below.
- i) Overall, the consultations indicated general community support for the proposed project interventions. Communities expressed showed their enthusiasm that restoration and scientific management of beels would improve fisheries productivity, enhance livelihoods, and strengthen local infrastructure. Participants particularly welcomed initiatives related to fisheries development, improved access to *beels*, capacity building, and livelihood diversification. Most communities indicated their willingness to cooperate with the project and supported the conduct of engineering surveys and technical assessments required for planning the interventions.
 - ii) The community is highly willing to participate in the project due to the fact that the beel is still contributing a major part of their livelihood and income. Rice with

fish is their staple food. According to the people, fish is not only good for health but also supports their meals free of cost.

- iii) The community expressed their concerns regarding the deteriorating health of their beel fishery due to the unabated growth of water hyacinth, siltation, pollution, and decreasing fish productivity. The beel management committees are helpless due to a lack of financial resources for de-weeding and de-siltation. They emphasized the importance of the project and the implementation of appropriate measures to restore their beels and improve people's livelihoods. Hence, they are hopeful about the overall project interventions.
- iv) Although rules and regulations are formulated at the BDC level, they are not properly adhered to. Due to various, most of the beels are fully covered with water hyacinth, lotus, and lily vegetation, resulting in low fish productivity.
- v) Another recurring issue raised during consultations relates to benefit sharing and institutional arrangements. Communities emphasized the importance of establishing transparent and inclusive local institutions, particularly BDCs, to manage project interventions at the local level. Participants highlighted the need for adequate community representation in these committees, including representation of fishers, local residents, and women's groups. They also expressed interest in understanding how benefits from fisheries development and related activities would be distributed among community members.
- vi) The people have no objection in constructing *beel* boundaries. But, some of them showed their apprehensions that they will lose farm land adjacent to the *beel* boundaries and also that they will lose their fishing rights once their *beel* are taken under the project. DoF staff at district level is organizing consultations before selection of *beel* and making the community aware of any such misleading information.
- vii) In many *beels*, it was noticed that some part of the land uses within the *beels* are used for seasonal farming activities. Associated livelihood risks were discussed with the community and accordingly consultation-based mitigation measures came up. No large-scale displacement of households is anticipated under the proposed interventions. The agreed mitigation measures—including timing of civil works after crop harvesting, relocation of temporary structures, exclusion of permanently encroached areas, and development of alternative livelihood facilities—will ensure that project activities proceed without causing significant social impacts.
- viii) Communities also identified several infrastructure and livelihood support needs that could enhance the sustainability of *beel*-based livelihoods. These include improved access roads to *beels*, fish landing platforms, storage and handling facilities, availability of quality fish seed, and technical training for fishery management. Women participants expressed interest in participating in livelihood opportunities such as fish processing, marketing, and value addition, particularly through self-help groups (SHGs).

- ix) A strong sense of community ownership over the beel is observed among the people. In SC and ST communities of Assam, beels are not only considered a source of livelihood but are also ritually associated with their fairs and festivals, and the holy water of the beel is worshipped on many occasions. Participants emphasized that continued engagement and culturally appropriate consultation processes would be important during project implementation.
- x) In all project villages, the women are found member of SHGs formed under Assam State Rural Livelihood Mission (ASRLM) which served as platforms for mutual support and empowerment. In many SHGs women have taken loan from banks for various purposes and making their own income through poultry, piggery, weaving, livestock, etc. All village women have their bank accounts.
- xi) The positive impacts of ongoing projects under World Bank financed Assam Agri-Business and Rural Transformation (APART) were appraised to the communities i.e. the beel resource users and they were convinced that the project after implementation will bring a desirable change in overall community benefit including more livelihoods to them.
- xii) Migration for job is common among the project communities, especially the youth migrate to big cities and other states in search of job. The trend is found high among the Other Backward Class (OBC) communities and the landless households in particular. During consultation, the youth (boys and girls) showed a strong willingness to receive training in food processing, value addition, marketing, and explore beel-based tourism opportunities at local level
- xiii) In terms of social security schemes, people have accessibility to most of them. The most vulnerable and disadvantaged sections also have community support due to strong social norms and established structures at the community level

51. Overall, the consultations highlighted the importance of continued stakeholder engagement, transparent communication, and inclusive institutional mechanisms to ensure that project interventions are aligned with local livelihood practices and community priorities. The findings from these consultations will inform the project's social management approach, including the formation of Beel Development Committees, community participation mechanisms, and measures to address livelihood concerns and ensure equitable benefit sharing. Community engagement, public consultations and disclosure will be an ongoing exercise through the subproject planning and implementation phase. The consultation process will be recorded and documented in the semi-annual social monitoring reports by the PIU and/or Cluster PIUs.
52. Overall, the consultations highlighted the importance of continued stakeholder engagement, transparent communication, and inclusive institutional mechanisms to ensure that project interventions are aligned with local livelihood practices and community priorities.
53. The findings from these consultations will inform the project's social management approach, including the formation of Beel Development Committees, community

participation mechanisms, and measures to address livelihood concerns and ensure equitable benefit sharing. Community engagement, public consultations, and disclosure will be an ongoing exercise through the subproject planning and implementation phase. The consultation process will be recorded and documented in the semi-annual social monitoring reports by the PIU and/or Cluster PIUs.

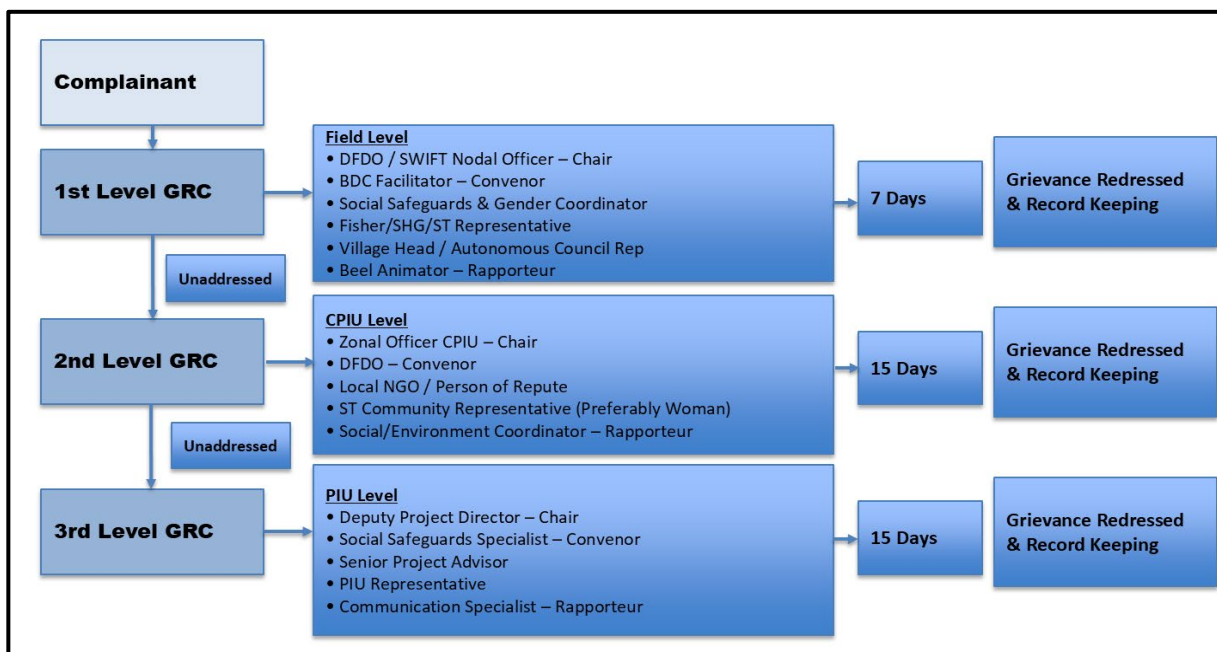

I. GRIEVANCE REDRESSAL MECHANISM FOR SWIFT PROJECT

54. A project-level grievance redressal mechanism (GRM) will be in place to address environmental and social safeguard concerns. Grievance is defined as any issue/concern arising from non-performance of obligations by any party involved in project processes, particularly in safeguard implementation. The GRM described below has been developed in consultation with the stakeholders and will be applicable to all subprojects implemented by IA under the SWIFT project. The GRM is anchored on the five principles, underpinning the grievance redress processes and the arrangements envisaged to implement these:
- a. **Transparency.** The GRM encourages comments and feedback (negative and positive) to improve the Project. The community must be aware of all complaints, grievances and problems reported; must be involved in their redress; and must be kept informed on progress made in resolving grievances. Information on GRM will be disseminated through various means to ensure that the poor, women, IPs, the vulnerable and the disadvantaged groups are made aware of grievance redress procedures and PMU/PIU will ensure that their grievances are addressed according to the time schedule, and feedback will be provided to the complainant.
 - b. **Socially Inclusive.** The whole community and even those outside, are given the opportunity to raise concerns and the right to receive a response. The GRM provides an accessible, inclusive, gender-sensitive, and culturally appropriate platform for receiving and facilitating resolution of affected persons' grievances related to the project.
 - c. **Simple and Accessible.** Procedures to file complaints and seek redress are kept simple and easy to understand by the communities, especially the non-literate. Affected persons will have the flexibility to convey grievances or suggestions through verbal narration (walk-in), by dropping grievance/suggestion forms in complaint boxes placed at accessible locations, through telephone hotlines, by email, by post, or by writing in a complaint register at the project site, CSC, and contractor offices
 - d. **Anonymity and Security.** To remain accessible, open, and trusted, the GRM ensures that the identities of those complaining are kept confidential. This encourages people to openly participate and file grievances. Careful documentation of the name of the complainant, date of receipt of the complaint, address/contact details of the person, location of the problem area and the grievance detail will be maintained by the project. The project will ensure a system for grievance tracking and monitoring, response accorded, its resolution status and closure. Social Experts PMU, PIU, CSC and animators will have the joint responsibility for timely grievance redressal on safeguards and gender issues and

for registration of grievances, related disclosure, and communication with the aggrieved party.

- e. **Institutional Capacity Building.** Through the GRM, the PMU will strengthen channels of communication and mechanisms for grievance redress at the community/project area level.

Figure5:Grievance Redress Mechanism

55. **Grievance Redress Arrangements and Role Functions:** A project based three-tier GRM arrangement is proposed to facilitate time-bound grievance resolution at each level. Responsible persons and agencies/offices are identified to address grievances and seek appropriate advice at each stage, as required. Institutional arrangements, including constitution of grievance redress committees (GRC) at various levels, will be ensured to function throughout the project duration. The PMU shall ensure the constitution of these committees and oversee the implementation of grievance redress processes, including adherence to time limits, record keeping, and documentation at each level.

56. Briefly the three-tier GRC will be as follows:

- i) **Field Level:** The first level of the GRM will function at the project location/site. The field-level arrangement will consist of ground implementation staff, including the village head/autonomous council representative, a member of a cooperative/SHG or committee, ST representatives or a member from a locally existing indigenous grievance settlement mechanism, and an NGO. All minor issues, and those perceived as immediate and urgent by the complainant, will be resolved at the field level itself (within 7 days).

In cases of larger issues that cannot be resolved at the field level, the matter will be escalated to the cluster PIU-level GRC, which is the second-level arrangement. A summary of grievance records will be submitted to the CPIU on a monthly basis.

The PIU-level Social Safeguards Specialist will monitor and provide guidance and support to the field staff in grievance redress and its record-keeping.

- ii) **Cluster PIU Level:** The second GRC will be established at the CPIU level, headed by the Zonal Officer/DFDO. The Social and Environment Coordinators of the CPIU will facilitate the process of grievance redressal. The committee will include a representative from the local body or an NGO, as per the nature of the grievance.

All grievances that cannot be resolved at the field level, and those directly registered at this level, will be addressed by this body within 15 days of receipt of the complaint. Proper documentation of grievances (including records of grievances redressed at the field level) will be maintained by the PIU.

In cases where the GRC at this level is unable to resolve a grievance within the stipulated period, the case will be escalated to a higher level for resolution. The CPIU-level GRC will also maintain follow-up for each grievance, periodically disseminate information to complainants on the status of their grievance, and record their feedback (satisfaction/dissatisfaction and suggestions)

- iii) **PIU Level:** The arrangement at the highest level will involve the constitution of a project-level committee headed by the Director of Fisheries-cum-Additional Project Director of the PIU as the Chairperson. The committee will receive support from the Social Safeguard Specialist/Environmental Safeguard Specialist in addressing grievances. Representatives of line departments will be nominated, as required, based on the type of grievance.

All grievances that cannot be resolved by the CPIU-level GRC will be brought to the attention of this body, seeking its advice or resolution at this level. Grievances received or referred to this committee will be resolved within 15 days. Periodic information will be provided to complainants on the resolution status of their grievances.

The Social Safeguard Specialist will be responsible for compiling grievance redress records, including project-level documentation and reporting.

- 57. The affected person/complainant shall have access to the country's legal system at any stage. Furthermore, accessing the country's legal system can run parallel to accessing the GRM and is not dependent on the negative outcome of the GRM.
- 58. **ADB Accountability Mechanism:** If the established GRM is not able to resolve a grievance, the affected person can also use the ADB Accountability Mechanism through directly contacting (in writing) the Complaint Receiving Officer at ADB headquarters or the ADB India Resident Mission (INRM). Before submitting a complaint to the Accountability Mechanism, affected/aggrieved person/s should make a good faith effort to solve the problem by working with the concerned ADB operations department. Only after doing so, and if they are still dissatisfied, will the Accountability Mechanism consider the complaint eligible for review.⁹The complaint can be submitted in any of the official languages of ADB's developing member countries. The ADB Accountability

⁹ <http://www.adb.org/Accountability-Mechanism/default.asp>.

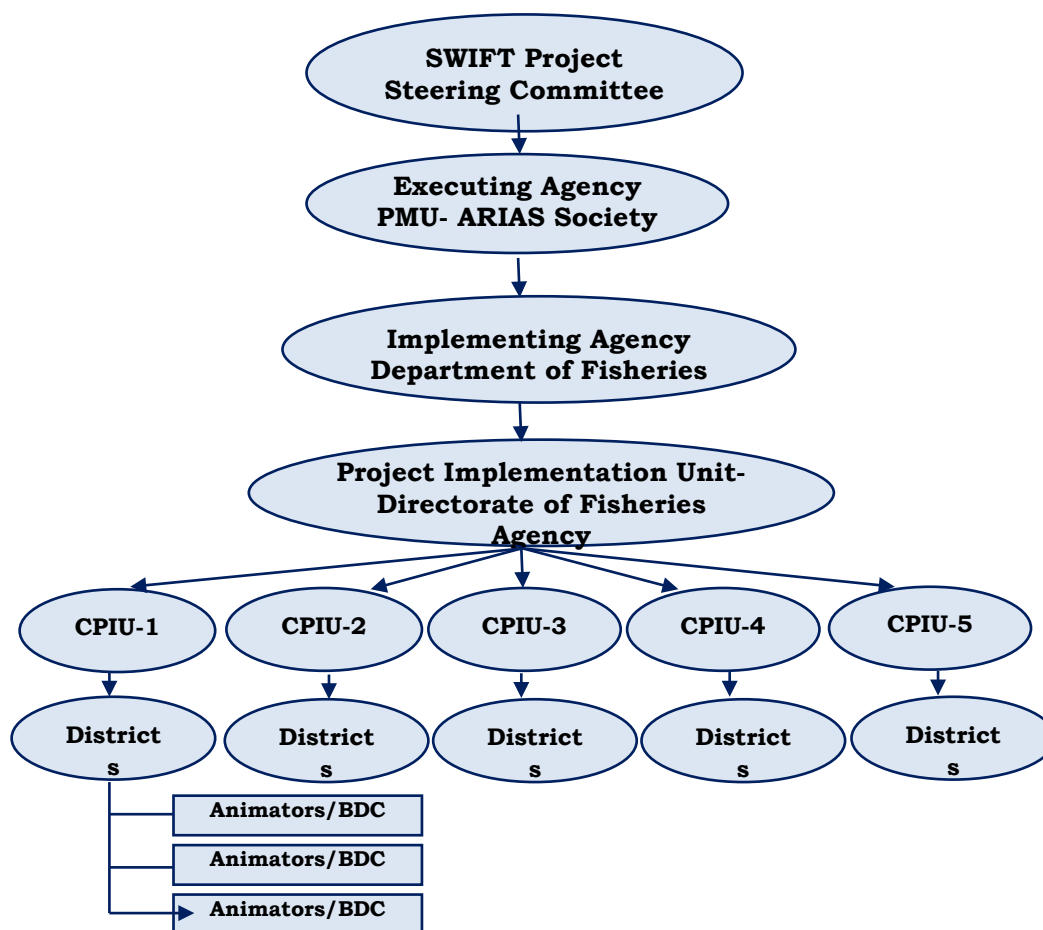

Mechanism information will be included in the project-relevant information to be distributed to the affected communities, as part of the project GRM.

59. **Consultation arrangements and information dissemination:** The GRM will adopt a consultative and participatory approach to grievance resolution, which may, in some cases, require one-to-one consultation with individual complainants or the aggrieved community. Furthermore, the PMU and the PIU Social Safeguards Specialist/Environmental Specialist will be responsible for disseminating information to affected persons on the grievance redressal procedure, ensuring that the host community understands the grievance redress process, and encouraging them to register complaints. Adequate consultations, meetings, and public awareness campaigns will be conducted to achieve this objective. Information on grievances received and responses provided will be documented and reported back to the affected persons. All grievances will be treated with utmost confidentiality, and the identity of the complainant will not be disclosed. A sample grievance registration form is at **Appendix 12**.
60. **Record Keeping:** The PMU with the support of PIU Social and Gender Specialist/Environmental Specialist will maintain the records of all grievances received, including contact details of complainant, date the complaint was received, nature of grievance, agreed corrective actions and the date these were taken, and outcome. As part of record-keeping and reporting practices, information on grievance tracking will also be maintained. Grievance reporting by PIU and PMU at their respective levels will include information for the reporting period and the cumulative data on select parameters such as total grievances received, redressed, pending, etc., since the project's inception. Summarized information will be included as part of periodic reporting by the PMU, with support from PIU, to ADB.
61. **Periodic review and documentation of lessons learned:** The PMU will periodically review the functioning of the GRM and record information on the mechanism's effectiveness, particularly in preventing and addressing grievances within the project.
62. **Costs:** All the costs involved in resolving the complaints (meetings, consultations, communication, and reporting/information dissemination) will be borne by project.

J. INSTITUTIONAL ARRANGEMENTS

63. The Executing Agency (EA) of the project will be Assam Rural Infrastructure and Agricultural Services (ARIAS) Society, headed by the State Project Director, under which a dedicated SWIFT Project Management Unit (PMU) has been established to lead, manage, and coordinate project activities.
64. The Department of Fisheries (DoF) will serve as the project's implementing agency, establishing its Project Implementation Unit (PIU) at the State headquarter level. It will conduct day-to-day project implementation and management on behalf of the IA. The entire state has been divided into five clusters/zone- Central, Upper, Lower, North, and South zonal offices, in order to effectively and efficiently implement activities across the 102 targeted *beels* in 29 districts.

Figure 6: Institutional Arrangement

65. Cluster Project Implementation Unit (CPIU) at Zonal levels is formed to coordinate with District Fishery Development Officers (DFDOs) which will be primarily involved in project implementation at district level with the support of Beel Development Committees (BDCs). The zone wise number of districts and *beels* are given below:

Table 3: Zone wise Priority Beels

Sl.	Zone	Districts	Number of Beels
1	Central Assam Zone (CPIU-1)	Nagaon, Morigaon, Kamrup, Kamrup Rural	15
2	Upper Assam Zone(CPIU-2)	Dibrugarh, Tinsukia, Sivasagar, Golaghat, Jorhat, Charaideo, Majuli	27
3	Lower Assam Zone(CPIU-3)	Dhubri, South Salmara,Kokrajhar, Bongaigaon, Barpeta, Bajali, Goalpara, Nalbari, Chirang, Baksa, Tamulpur	22
4	South Assam Zone(CPIU-4)	Cachar, Karimganj, Hailakandi	1
5	North Assam Zone(CPIU-5)	Darrang, Sonitpur, Biswanath, Lakhimpur, Dhemaji	9
Total			74

66. The PIU has engaged a Social Safeguard Specialist(SSS), who will be responsible for overall safeguards implementation and coordination across the project. The SSS will be supported by Social Safeguard and Gender Coordinators hired at Cluster PIU (CPIU) level. The BDC facilitator of the agency hired for mobilization and capacity building of the BDC to be engaged by the PMU will support the SSS in safeguard management.

The project will also engage animators to facilitate social mobilization, consultation, and capacity support at the subproject level for a period of 7 years.

67. A consolidated Social Monitoring Report (SMR), covering all subprojects, will be prepared semi-annually and submitted to ADB for review and guidance, within 30 days from the end of the reporting period. The SMR will report on the progress of the IPP implementation. The CSC will support PMU and PIUs in monitoring and reporting on IPP implementation and preparation of the SMR. Upon clearance by ADB, the SMRs will be publicly disclosed on the ADB's and DOF's websites. Submission of SMRs to ADB will continue until the end of the project and an implementation completion report is issued.

K. CONCLUSION

68. Based on the IR due diligence study carried out for the project, it is concluded that the subproject intervention will not cause any IR impact. For any off-beel construction the proposed land will be utilized through consent and will not involve any acquisition of private land. The proposed interventions will not result in any loss of livelihood or cause restriction of land use. The project IR categorization is 'C' as it will completely avoid and does not include any subproject that might cause any kind of IR impacts.
69. The EA through the concerned agencies engaged in the Project will carry out appropriate due diligence screening to ensure that none of the proposed components in any of the subprojects would cause physical and/or economic displacement, including permanent or temporary impacts on titled or non-titled land users. For each subproject/components, concise due diligence section with documentary evidence, including maps and photographs, will be prepared to demonstrate the absence of involuntary resettlement-related impacts. If there is an unanticipated impact, the IA will prepare a resettlement plan, and the project's IR categorization will be updated accordingly.
70. To ensure that IPs are informed, consulted, and mobilized to participate in the sub-projects during project preparation, and to ensure equitable sharing of program benefits, an Indigenous Peoples Plan (IPP) will be prepared for the project. The IPP would ensure that project interventions are planned in a manner which is culturally acceptable to the beneficiaries and does not impact their customary practices. Meaningful consultations with, and participation of, IP communities will be an integral part of the overall IPP preparation.

L. RECOMMENDATIONS

- i) The EA, through DoF, will ensure establishment and functioning of the Grievance Redressal Mechanism [GRM] before execution of sub-projects.
- ii) The GRM should be established at all three (3) levels prior to the initiation of civil works, and awareness on the same among the community and relevant stakeholders should be created.

- iii) Demarcation of beel boundaries would be carried out in the presence of villagers, owners of the adjacent land, and officials from the Revenue Department to avoid any boundary disputes.
- iv) Any construction-related impacts caused during the execution of the project would be mitigated as per the Environmental Management Plan (EMP) prepared for the project. The EA will ensure periodic reporting to ADB by submitting a semi-annual social monitoring report, including progress of agreed measures and compliance with loan covenants.
- v) To support other livelihood opportunities under the project, a livelihood plan should be implemented, including the IPs, and in convergence with other departments such as Handloom, Cottage Industries, Horticulture, Tourism, etc., to identify possible interventions and set achievable targets. The suggestions given by the communities during consultations should be taken into consideration by the EA while planning livelihood activities in convergence with other government departments.

Appendix 1: List of Priority Subprojects Under SWIFT Project

Appendix 2: Govt. Notification on Settlement of Transferred Fisheries

GOVERNMENT OF ASSAM
ADMINISTRATIVE REFORMS AND TRAINING DEPARTMENT,
DISPUR, GUWAHATI-06

Dated Dispur, the 1ST November, 2018

ORDERS BY THE GOVERNOR

NOTIFICATION

No AR.122/2018/27: In pursuance of the decision taken in the State Cabinet meeting held on **01-06-2018**, the Governor of Assam is pleased to order the transfer of Administrative control of **Revenue fisheries from Revenue & Disaster Management Department to Fishery Department, Government of Assam** with immediate effect, subject to the following terms and conditions:

1. The administrative control of revenue fisheries is transferred from Revenue & Disaster Management Department to Fishery Department to enable the Fishery Department to exercise the powers conferred by the Section 16 Read with Section 155 & 156 of the Assam Land and Revenue Regulation (ALRR), 1886 for sustainable development and management of such fisheries.
2. The settlement of transferred fisheries shall be governed by the Assam Fishery Rules, 1953 and shall be made by the Government in Fishery Department henceforth.
3. The settlement of revenue fisheries at the field level, shall however will continue to be made by DCs/SDOs as is being done now under Assam Fishery Rules, 1953.

This Notification will come into force with immediate effect.

Commissioner & Secretary to the Government of Assam
Administrative Reforms and Training Department

Memo No. No AR.122/2018/27-A

Dated Dispur, the 1ST November, 2018

Appendix 3: Template MoU for Community or Private Land

This Memorandum of Understanding (MoU) is signed on,between the landowner/occupier of the land/plot No. located at represented by Shri/Smt.....(Village head, Member autonomous council)(Hereafter referred to as '*First Party*'),and the Beel Development Committee (BDC) of Village represented by Shri/Smt(Chairman/Secretary) (hereafter referred to as the '*Second Party*') and representative of DoF Shri/Smt (District Fishery Development Officer) of District (Hereafter referred to as the '*Third Party*').

1. Objective of the MoU

The objective of this MoU is to obtain consent from the First Party for utilization of aforesaid land/plot with an area of hectares by all the parties signing the agreement for the implementation of the SWIFT Project supported by the Government of Assam and Asian Development Bank (ADB), hereafter referred to as '*the Project*' by all Parties signing this agreement.

2. Role and Responsibilities of the First Party

- i. The First Party will ensure that all households /clan members concerned are fully informed about and have willfully given their consent / no objection for utilization of the above-mentioned land/plot to implement the Project in the village supported by the Government of Assam and Asian Development Bank (ADB) for the benefit of the village community.
- ii. The First Party shall cooperate and thereby implement all prescribed initiatives in the cited plot of land to achieve the objectives for which it is intended.
- iii. The First Party shall continue to exercise their existing right over the beel. However, the right over the assets/infrastructures created under the project on the said land during and beyond the project period shall be vested in the Second Party.
- iv. The First Party and village community shall jointly share the benefits arising out of the beel restoration and livelihood opportunities.

3. Role and Responsibilities of the Second Party

- i. The Second Party together with the First Party shall ensure implementation of the village livelihood plan in line with SWIFT project and Assam Fishery Rules,1953, (amended in 2005).
- ii. The second party shall ensure sharing of benefits with the First Party in case the Project initiative results into generation of livelihood opportunities and its associated revenue in future.
- iii. The Second Party will ensure that the community utilizes the beel and land resource for the purpose for which it is intended.
- iv. The Second Party shall fully inform and take consent from the First Party incases where it plans to implement project initiatives other than the purpose for which it is intended.
- v. The Second Party will ensure that no clear felling of trees will take place in the said

catchment area except harvesting matured trees for their own use and no habitation, setting up of sand/stone quarry, jhum cultivation and other activities are carried out that affect water discharge and result in to efficient discharge of water.

- vi. The Second Party shall take initiative to seek additional necessary resources for implementing soil and water conservation measures for rejuvenating the beel resource.
- vii. The Second Party shall take initiative to mobilize necessary resources for maintenance of the assets generated in the plot of land allotted to the BDC by the First Party.

4. Role and Responsibilities of the Third Party

- i. The Third party shall provide all technical assistance required for implementation of the Project.
- ii. The Third Party shall ensure that ADB's social and environment safeguards are followed in all activities taken up under the Project.
- iii. The Third Party shall initiate and conduct of joint inspection with the First Party and the Second Party to ensure quality of work.
- iv. The Third Party shall assess and approve the livelihood activities in the village area proposed by the First Party and the Second Party.

5. Conflict Resolution

Any dispute, controversy, differences or claim arising out of or relating to this MoU including the existence, validity, interpretation, performance, breach or termination thereof or any dispute regarding non-contractual obligation arising out of or relating to it shall be first resolved through mutual understanding failing which, the matter will be referred to the Deputy Commissioner for dispute resolution.

6. Extent of the MOU

At the end of the project, the status of the infrastructure and the intentions of all parties will be assessed and the following applied:

- a. Where no changes are required, the current MOU will carry on upholding the agreement based on a seven year reassessment program
- b. Where changes are negotiated, but continuation of project interventions agreed, new MOUs will be signed.
- c. For sites that are no longer planned to be used for the same purpose, the second and third party will be responsible to rehabilitate the areas wherein structures were built.

Signature and Seal of the First Party

Represented by

.....
Land owner/panchayat representative/ EM of autonomous council

TWO WITNESSES: (NB: *It is recommended that land owner/panchayat representative/member of autonomous council sign with seal as one of the witnesses in cases where they have not signed above, wherever required*)

1. Name.....Village.....Signature with
date.....

2. Name.....Village.....Signature with

(as may be authorized by the O/o the DoF)**

It is verified that,

1. The land required for the project is given voluntarily and the land to be provided is free from any dispute on ownership or any other encumbrances.
2. The process of formal consent for land utilization was transparent and carried out without coercion.
3. The affected parties will not be impoverished by the land utilization (i.e., no more than 5% of total agricultural land holding provided), and
4. The land utilization will not displace any parties including tenants or labor, if any, on the land.

Name & Signature with date & Official Seal of the Verification Authority

Appendix 4: Template for NOC

Date: _____

This no objection certificate is hereby issued regarding the implementation of the following community infrastructure intervention which have been proposed in the Village _____ under Block _____ in the District of _____.

“Sustainable Wetland and Integrated Fisheries Transformation Project”

The village inhabitants have requested that these infrastructure interventions will be realized by the **Project** since no other support is available for this.

I herewith also certify that the proposed community infrastructure will be realized on ***agreed community land/ agreed private land***, which is not subject to any dispute.

I also confirm that:

1. The village communities understood the project and subproject/interventions during the consultation meetings;
 2. During the consultation meetings, the village communities have expressed their opinion and needs without coercion from internal and external participants;
 3. A Beel Development Committee has been formed for the subproject;
 4. The village communities will provide all required support during project implementation;
 5. The community members are committed to take charge of operation and maintenance of all community infrastructures after this have been completed and handed over to the community.
- I welcome realization of the proposed interventions as early as possible.

Sample Social Safeguard Screening Checklist

Sustainable Wetland and Integrated Fisheries Transformation (SWIFT) Project

Place: Judgaon Name of Beel: Becharani Beel Date: 6.08.2024
Mongaon district

1. Management of beel. A management committee called 'Jathya Monga Aikantik Jajati Beel Development and Conservation Committee' having 33 members President - Manohar Jaisri. Earlier, the beel was given a lease for 5 lakh Rs. per annum but now the committee is doing fishing and marketing of its own. The benefit is shared among all 150 HH of Judgaon.
2. Use of beel. Beel is primarily used for fishing for individual and commercial purpose. Migratory birds ^(Ducks) are used to come in winter.
3. Main problems related to fisheries. The approach road to beel is damaged. Lotus, lily and water hyacinth are major problems. De-weeding is must in order to improve fish productivity. Community is found willing to participate in the project since.
4. Willingness to participate in the program. There are no other govt schemes which can help them financially and technologically in De-weeding.
5. Community conflict related to use and management of beel. No major conflict was reported. The village has its traditional system of grievance redressal. Any major case is resolved by autonomous council.
6. Encroachment ----- type and nature. The beel is free from all encroachment. No encroachment.
7. Involvement of ST people in fisheries. name/ no. of HH. In Judgaon there are 150 HHs. All are from Tiwa ST Community. This village comes under Tiwa Autonomous Council. Mr. Khagenich Bordoloi is the Executive Member.
8. Community's suggestion. The village has 26 women SHGs and some of them have taken loan from bank for farming, livestock, poultry, fishery etc. According to them they need training and equipments for weaving (have traditional skill) and marketing of fish by-products.

42. Attendance sheet of Public Consultation at Pera Beel, Tinsukia-21.12.25

Pera Beel

প্ৰতি,
মাননীয় জিলা মীন বিষয়া মহোদয়ৰ সমীপে,
তিনিচুকীয়া মীন বিভাগ, অসম।

বিষয় : বিল উন্নয়নৰ সন্দৰ্ভত আবেদন পত্ৰ।

মহোদয়,

সন্মান সহকাৰে সন্মানীয় জিলা মীন বিষয়া মহোদয়ক আমি শদিয়া মহকুমা
লগতে তেলিকলা-মাজগাঁও অঞ্চলবাসীয়ে বিশেষকৈ “তেলিকলা মাজগাঁও ফিচফাৰ্ম”
তৰফৰ পৰা এটি বিশেষ অনুৰোধ জনাব বিচাৰো যে, বৰ্তমান সময়ছোৱাত ড॰
হিমন্ত বিশ্ব শৰ্মা ডাঙৰীয়াৰ নেতৃত্বাধীন বি.জে.পি চৰকাৰখনে বৰ্তমান অসমৰ পৰিভুক্ত
অৱস্থাত থকা বিলসমূহৰ উন্নয়নৰ এক বৃহৎ আঁচনি ৰূপায়ন কৰিছে আৰু আমাৰ
শদিয়া সম জিলাৰ অন্তৰ্গত আমাৰ অঞ্চলৰ “পেৰাবিল” নামৰ এখন বৃহৎ বিল
পৰিভুক্ত অৱস্থাত আছে। আমি সকলোৰে বিচাৰো বিলখনৰ সৰ্বাঙ্গীন উন্নয়ন হওক।

গতিকে মহোদয়ে আমাৰ বিলখনত দৃষ্টি নিষ্ক্ষেপ কৰি আগন্তুক দিনত বিলখনত
উন্নয়নৰ আঁচনি সমূহ ৰূপায়ন কৰে যেন।

এইয়ে অঞ্চলবাসীৰ লগতে আমাৰ তেলিকলা মাজগাঁও ফিচফাৰ্মৰ তৰফৰ পৰা
বিনম্ৰ অনুৰোধ জনালোঁ।

ধন্যবাদেৰে..

বিনীত
